

ATp Cellular-Based GPS Tracking (with Power Option)

The ATp Tracking Device (ATp) provides the best features of the AT device with the ability to utilize vehicle or asset power when available.

This unique device senses when it is connected to external power and can be programmed to send its location more frequently.

As a result, you can get fleet-like tracking options when powered and battery-powered tracking when no external power is available.

Casing	Waterproof – IP68 rated
Temperature Range	–20°C to 85°C
Dimensions	6.75" x 2.75" x .75"
Battery Capability	Reports up to 800 location messages
External Power	Available
